SEED OF THIS VARIETY (STRAIN, LINE ETC..) IS NOT REGISTERED FOR SALE IN CANADA EXCEPT AS PRESCRIBED BY FEDERAL SEED REGULATIONS.

Certificate invalid unless this area is completed

Le certificat est non valide à moins que cette section soit remplie

I hereby declare that the total quantity of seed harvested from this crop before cleaning was:

Kilograms

J'atteste par la présente que la quantité totale de semences récoltées provenant de cette culture avant le nettoyage était:

Kilogrammes

Signature of grower (or assignee if covered by separate declaration from grower)

Signature du producteur (ou du cessionnaire si couvert par une déclaration séparée du producteur)

The grower named on this certificate has been accepted as a regular member in accordance with the Bylaws of the Canadian Seed Growers' Association

Le nom du producteur de ce certificat a été accepté comme membre régulier conformément aux règlements de l'Association canadienne des producteurs de semences

EXECUTIVE DIRECTOR - DIRECTEUR EXÉCUTIF

**Subject: variety descriptions for breeder seed plots**

**Date: Sat, 12 Apr 2003 20:17:41 -0600**

**From: Alfred Slinkard <slinkard@sask.usask.ca>**

**To: David Benallack <benallack@sask.usask.ca>**

Earlier, I sent you a short variety description for CDC Canafen fenugreek and for CDC Canagreen fenugreek. I hope they were adequate. If you need more detail, I will try to supply it.

I am including a brief variety description of CDC Giant dill:

Variety Description for CDC Giant dill

This variety is the result of two cycles of recurrent selection for high seed yield and adaptation to western Canada from the variety Mammoth dill. Accordingly, it resembles the variety Mammoth dill in being tall (often over 1.5 m in height) and large-fruited (2 seeds/fruit), relative to other varieties of dill.

**Sent:** March-14-11 3:33 PM  
**Subject:** Re: CDC Giant

CDC Giant is a reselection of the old variety Mammoth. It was reselected for 15 % higher seed yield (data discarded years ago, I think). It is very similar to Mammoth in other traits. To my knowledge, no other data are available any longer. Some information may be available in old reports on spice breeding, where ever they may be.

I am sorry that I can't be of more assistance, but I have been retired for 13 years and have no records available.

Dave Benallack wrote:

Any chance someone has or can make up a variety description for CDC Giant. CSGA requires this in order for me to obtain a crop certificate for it.

Thanks,  
Dave
